Cell Reproduction Section 3
Study Guide Answers
Reproduction describes the production of eggs and sperm and the processes leading to fertilization. The reproductive system consists of the primary sex organs, or gonads (testes in males and ovaries in females), which secrete hormones and produce gametes (sperm and eggs). Accessory reproductive organs include ducts, glands, and the external genitalia.

Sexual and Asexual
Reproduction Study Guide

Asexual reproduction is a type of reproduction that requires only one parent.

The resulting offspring are identical to the parent.

Sexual Reproduction produces new organisms from the combined DNA of two parents.
