Some times called high wall air conditioners, wall mounted monoblock air conditioning is a neat solution to older buildings where planning does not permit the installation of an external condenser unit. The wall mounted monoblock air conditioner attaches high on the wall and two air pipes are routed from the back directly through the wall. The disadvantage of these air conditioners is that they are slightly larger in-depth compared to split wall mounted unit as the condenser is contained ...

Wall mounted air conditioners are arguably the most popular form of AC units in the UK, used to eliminate warm air from the room. This is due in part to the recognition of the affordability of these cooling units as well as their flexibility in aesthetic and positioning. The units can be mounted on almost any wall and are positioned at a high level on the wall, ensuring an unobtrusiveness that will easily blend into the background in most settings.

Air Conditioner Installation Costs Explained - Canstar Blue

A BTU (British Thermal Unit) is a rating used to determine the heating or in the case of an Air Conditioner the cooling capacity of an appliance. Typically a minimum of 7000 BTU is needed to cool a small room, whereas commercial units can reach up to 25,000 BTU and beyond. Simply, the greater the BTU, the larger the space that the unit can cool.
