The four basic arithmetic operators are: add (+), subtract (-), multiply (×) and divide (÷) For addition and subtraction, when unlike signs are together in a calculation, the overall sign is negative. Thus, adding minus 4 to 3 is $3 + (-4)$ and becomes $3 - 4 = -1$. Like signs together give an overall positive sign. Thus subtracting minus 4 from 3 is $3 - (-4)$ and becomes $3 + 4 = 7$. For multiplication and division, when the numbers have unlike signs, the answer is negative, but when the numbers have like signs the answer is positive.
