AP biology lab 9 help? theres a chart in his lab and i need to explain the effects and the explanation of the effect of transpiration with the conditions of a fan, mist, light and room temperature. Help would be greatly appreciated, im freaking out i cant understand this.

AP biology lab 9 help? | Yahoo Answers
Introduction: All cells come from preexisting cells and eukaryotic cells must undergo mitosis in order to form new cells. The replication of a cell is part of the overall cell cycle (Figure 1) which is composed of interphase and M phase (mitotic phase).M phase, which consists of mitosis and cytokinesis, is the portion of the cell cycle where the cell divides, reproducing itself.

Lab 9 transpiration Example 2 ap. Most of the water a plant absorbs is not used for a plant's daily functioning. It is instead lost through transpiration, the evaporation of water through the leaf surface and stomata, and through guttation, which is the loss of water from the vascular tissues in the margins of leaves.
