Launch Decision
Risky Technology
Why did NASA
managers, who

not only had all the information prior to the launch but also were warned against it, decide to proceed? In retelling how the decision unfolded through the eyes of the managers and the engineers,

Bookmark File PDF Challenger

Vaughan uncovers
an incremental
descent into
poor judgment,
supported by a
culture of high-
risk technology.

The loss of the

Space Shuttle Challenger in 1986 is usually ascribed to NASA's decision to accept a safety risk to meet a launch schedule.

Vaughan, a professor of sociology at Boston College, argues instead

that the
disaster's roots
are to be found
in the nature of
institutional
life.
