AR5 Climate Change 2014: Impacts, Adaptation, and ...

The goal of mitigation is to avoid significant human interference with the climate system, and * stabilize greenhouse gas levels in a timeframe sufficient to allow ecosystems to adapt naturally to climate change, ensure that food production is not threatened and to enable economic development to proceed in a sustainable manner " (from the 2014 report on Mitigation of Climate Change from the United Nations Intergovernmental Panel on Climate Change, page 4).

Mitigation and Adaptation | Solutions — Climate Change ...

Climate change mitigation consists of actions to limit the magnitude or rate of global warming and its related effects. This generally involves reductions in human emissions of greenhouse gases (GHGs). Fossil fuels account for about 70% of GHG emissions. The main challenge is to eliminate the use of coal, oil and gas and substitute these fossil fuels with clean energy sources.

Climate change mitigation - Wikipedia
