Aim to eat at least 5 portions of a variety of fruit and veg each day. Choose from fresh, frozen, tinned, dried or juiced. Remember that fruit juice and smoothies should be limited to no more than a combined total of 150ml a day. Fruit and vegetables are a good source of vitamins, minerals and fibre.

An important part of managing your condition is to eat a healthy, balanced diet. There's no such thing as a 'diabetic' diet or 'diabetic' recipes. You'll find advice and tips on everything from healthy swaps, understanding food labels, how to cook healthier meals, meal planning and shopping on a budget.

*Healthy eating | Diabetes UK*

In the UK, current 2016 NHS diabetes diet advice is that there is no special diet for people with diabetes. Many people with diabetes focus on the carbohydrate content of their meals and prefer a low-carb diet for tight blood glucose level control. The NHS (and Diabetes UK ) recommend a healthy, balanced diet that is low in fat, sugar and salt and contain a high level of fresh fruit and vegetables.

Foods that are cited as being 'acid-producing' by advocates of the diet include meat, wheat and other grains, refined sugar, dairy products, caffeine, alcohol and processed foods. Foods that are considered 'alkaline foods' include fruit and vegetables. The diet was originally developed to help prevent kidney stones and urine infections, as the pH of your urine changes depending on what you eat.
