Environmental management : Waste - detailed information ...

An environmental management system is "a system and database which integrates procedures and processes for training of personnel, monitoring, summarizing, and reporting of specialized environmental performance information to internal and external stakeholders of a firm". The most widely used standard on which an EMS is based is International Organization for Standardization 14001. Alternatives include the EMAS. An environmental management information system or Environmental Data Management System

Environmental management system - Wikipedia

An Environmental Management System (EMS) provides your company with a framework through which its environmental performance can be monitored, improved and controlled. Some organisations have adopted the framework specified in national or international standards, which set out the requirements of an EMS, and have had their systems externally assessed and certified against these, others have developed their EMS in a more informal way.
