Biology Karyotype Worksheet Answers Key

This worksheet gives students a chance to practice identifying genotypes on pedigree charts. The pedigrees focus on human genetic diseases, such as albinism, cystic fibrosis, tay-sachs, and sickle cell anemia. Some students do struggle with these charts, so I usually practice doing a few with them. If the parents are both heterozygous (Aa x Aa) many students will be confused about the genotype of an offspring who does not have the disease.

Pedigrees - Human Genetic Disorders

Sleep disorders, More severe and rare neurological complications such as strokes, brain inflammation, delirium and nerve damage. People of all ages who experience fever and/or cough associated with difficulty breathing or shortness of breath, chest pain or pressure, or loss of speech or movement should seek medical care immediately.
