•Diarrhoea may also be caused by a high intake of fatty foods. Avoid foods high in fat, such as chips, fast foods, burgers and sausages, crisps and cakes. Try low fat versions.

Irritable bowel syndrome and diet - NHS

It also includes guidance on daily fluid consumption. However, the sensitive guts of people with IBS may react to certain fruits and vegetables that contain poorly absorbed sugars, fats, wheat based cereals, dairy products, hot spice, coffee, and some high fibre foods, begging the question, What can I eat?

So What Can I Eat? | The IBS Network

The good news is that with the right diet plan, the majority of people with IBS do see an improvement. Because all bodies, and all digestive systems, are different, there is no one, standard "Irritable Bowel Syndrome Diet" that will work for every single person across the board.

The Best IBS Diet: What to Eat to Calm Your Belly | IBS...

An introduction to diet and IBS. Irritable Bowel Syndrome (IBS) is a highly individual condition and gives rise to a variety of symptoms. Although many factors can be involved in the condition, in several cases, IBS can be largely managed through diet. Food intolerance and trigger foods are common issues in IBS which, if identified, can be managed.

IBS diet - what to include and what to avoid

Your doctor may recommend avoiding foods that contain gluten—a protein found in wheat, barley, and rye—to see if your IBS symptoms improve. Foods that contain gluten include most cereal, grains, and pasta, and many processed foods. Some people with IBS have more symptoms after eating gluten, even though they do not have celiac disease.
