In healthy cats, ivermectin has a high margin of safety. Overdose can occur when pet owners administer ivermectin products for livestock on their cat in an attempt to save money. Clinical signs can develop in cats exposed at greater levels than 2.5 mg per kg, although toxicosis has been reported in cats at a dose of 0.3-0.4 mg/kg subcutaneously ...

Ivermectin For Cats | Cat-World

Ivermectin is a macrocyclic lactone that has been used since the 1980s for cows, sheep, goats or horses. Its antiparasitic activity is the reason why this treatment was extended to pet care, treating animals like dogs and cats. Ivermectin functions by paralyzing and, consequently, killing the parasites.
