Your lab results are to be turned in via Google Docs. Check your Google Apps account for a shared document called, "Paper Coaster Lab Data." Background: An object will travel in a straight line until a force acts to change its path of motion. This means that to travel in a circle (or a loop) the force must act on an object to push it sideways. When the force acts to push the ball to the inside ...

~~The Great Paper Roller Coaster Challenge~~

Paper Roller Coaster Lab Activity: The goal of your next project is to design and create a roller coaster that is made out of paper. Before we start we need to explore roller coaster design and how they work. What is centripetal force? How fast does the coaster need to go to complete a loop? What angels work best for your design? This lab will help you! Challenge/Problem: • To construct a ...

~~Paper Roller Coaster Lab - Central Bucks School District~~

In this lab, you will collect data about your roller coaster and marble as it travels along the track. You will then organize this data and use it make conclusions about your roller coaster. These instructions are a class set, so you will need to develop a lab report on your own sheet of paper.

In the case of a marble on a paper roller coaster, a marble starts at the top of the roller coaster with a relatively large amount of potential energy and no kinetic energy. As the marble starts rolling down the roller coaster, the amount of potential energy stored in the marble decreases while its kinetic energy increases.
