Prs Setup Guide - download.truyenyy.com

First, adjust the truss rod relief. Measure the distance from top of fret to bottom of string while depressing the string at the 1st and last fret: Relief should measure .005 - .010" at the 8th fret. Once the relief has been set, measurements for string height should be as follows: (measures top of fret to bottom of string): Bass side string height 1st fret: 1.5/64".

What are the factory specifications for my PRS guitar setup?

Adjustable Stoptail Tuning and Setup Hints Action height is adjustable by raising or lowering the studs the bridge sits on. To adjust the mounting bolts, first detune the instrument to relieve the tension on the bridge. Then using a
