Hot melted rock from the middle of our planet forces its way up through cracks in the Earth's crusts, exploding violently and sometimes unexpectedly in volcanic fury that can terrorize populations for months, even years.

Volcanoes! (National Geographic Kids) Printables ...

Volcanoes often form a hill or mountain as layers of rock and ash build up from repeated eruptions. Volcanoes are classified as active, dormant, or extinct. Active volcanoes have a recent history of eruptions; they are likely to erupt again. Dormant volcanoes have not erupted for a very long time but may erupt at a future time.

Volcanoes | National Geographic Society

Volcanoes erupt in different ways. Some, like Mount St. Helens, explode. Explosive eruptions are so powerful, they can shoot particles 20 miles up (32 kilometers), hurl 8-ton boulders more than a half mile (0.8 kilometers) away, and cause massive landslides.

Volcano facts and photos - National Geographic Kids

A volcano is an opening in Earth's crust that allows molten rock from beneath the crust to reach the surface. This molten rock is called magma when it is beneath the surface and lava when it erupts or flows from a volcano. Along with lava, volcanoes also release gases, ash, and rock. It's a super hot mix that can be both incredibly destructive and creative.

Volcanoes | National Geographic Society

This fascinating reader provides a fascinating look inside volcanoes with a little science, a little history, and a lot of dramatic National Geographic photographs. Hot melted rock from the middle of our planet is forced into a jagged journey through cracks in the earth's crust until it explodes, violently and unexpectedly, in a volcanic eruption that can NOW IN SPANISH!

6. Volcanoes are classified as active, dormant or extinct. This refers to the amount of volcanic activity. "Active" means there's regular activity, "dormant" means there's been recent activity but the volcano is currently quiet, and "extinct" means it's been so long since the last eruption that it's unlikely to ever erupt again. 7.
